We just got off the phone but I'll acknowledge here as well:

Situation: I wish it were not so, but **We are running out of time on everything. We need to complete the assets** -- so choices that complicate or delay delivery can no longer be made. **Thor needs to work whenever he can on these maps and not wait to schedule a meeting time.**

Solution: **The best thing we can do to make us Canon Proof on the maps is to indicate only the Points of Interest (POI) necessary to give context to the audience.** What makes a map a contradiction is when there is so much information that a comparison can be made. **Therefore the less information we give, the less chance we have of putting a certain star or planet in the wrong place.**

Proposed Action: Assemble all POI that you want to communicate to Thor. Take iPhone pictures of Larry's maps, send the correct spelling and words. Give Thor a very clear and specific direction re: these aspects of the remaining maps and he will deliver like the Triple Crown Winner that he is.

I am on this, but I have to have Christopher, our Klingon Translator on this as well, and I just heard from him as he was working yesterday.

The problem is the first map does not follow the star maps. This is why I need to be with Thor to work with him.

And I have

Hey Alec:

Thor needs point of interest names for his maps. Immediately is preferable and advised.

I can do this alone, but I know you wanted oversight, so please let me know how soon we can get together and do this.

Christian
